Project Report-Infographic Design on Digital Literacy and Online Safety

For this task, I used **Canva** to create my infographic because it is easy to use and provides many free templates and design elements. My design covers three important topics: digital literacy, safe internet practices, and email etiquette. In the infographic, I explained digital literacy as the ability to use digital tools effectively and responsibly. I also included key safety tips such as avoiding suspicious links, protecting personal information, and using strong passwords. Additionally, I highlighted basic email etiquette rules like using a clear subject line, maintaining a polite tone, and structuring emails properly.

The design uses icons, short points, and simple colors to make the information easy to understand and visually appealing. One thing I found interesting was how creative design can make complex information look simple and engaging. However, I found it slightly difficult to arrange all the content neatly without making the infographic look crowded. Overall, this task helped me improve both my digital skills and creativity.
